Mimiko Ltd. is an industrial compressed air expert.

Our **EXAIR air-conditioning products** provide information, professional advice and solutions to almost every area of the economy (cooling, heating, drying, ionization, vacuum technology) to solve a wide variety of problems. Mimiko Ltd. is the exclusive distributor of Exair products in Hungary, and leading distributor in Serbia and Ukraine.

Our Values

Based on our partners' feedback, brands sold by Mimiko Ltd., and the **helpful, sympathetic, instant responsive and reliable**, the qualities that come back to us and offer our company further.

With a **professional advice and suggestion**, we are on a daily basis in the lives of our clients, taking part in their daily lives, helping them to solve the problems that arise in their work.

Our strength is flexibility, precision, and speed.

Our engineering expertise and solution orientation, with nearly 20 years of professional experience, ensures our customers' high standard of service.

Are you problem the static? My solution the Exair neutralize product lines, high concentration of positive and negative ions to neutralize static electricity with or without requiring compressed air. This compact and

shockless static eliminator is the ideal way to eliminate static electricity problems occurring in small or very big distance workstation.

Are you problem with the CNC chips cleaning? The compressed air operated Chip Vac is an industrial duty vacuum designed specifically for vacuuming chips. It creates a powerful direct flow action that vacuums metal, wood or plastic chips into an ordinary drum. Designed for occasional use with dusty materials, the included filter bag keeps the surrounding air clean. Electrically operated “all purpose” vacuums aren’t designed for use in industrial environments. As a result, motors wear out quickly and impellers clog. The Chip Vac has no moving parts to wear out or break which ensures long life. Sound level is half that of electric vacs.

Do you search the best blow off or dryer system elements? Air Knife is the latest generation of our engineered air knife that dramatically reduces compressed air usage and noise when compared to other blowoffs. The Super Air Knife offers a more efficient way to clean, dry or cool parts, webs or conveyors. It delivers a uniform sheet of laminar airflow across the entire length with hard-hitting force. Noisy blowoffs become a whisper when replaced with the compact Super Air Knife. Even at high pressures of 80 PSIG (5.5 BAR), the sound level is surprisingly quiet at 69 dBA for most applications! Air amplification ratios (entrained air to compressed air) of 40:1 are produced.

Do you like the better cooler than the climate system? EXAIR Cabinet Coolers incorporate a vortex tube to produce cold air from compressed air – with no moving parts. The compact Cabinet Cooler can be installed in minutes through a standard electrical knockout. NEMA 12, 4, and 4X (IP54 and IP66) Cabinet Coolers that match the NEMA rating of the enclosure are available in many cooling capacities for large and small control panels.
